DETAILED ACTION

1. Claims 1- 17 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-12, drawn to a recombinant viral vector which contains an insert exhibiting the general structure rTA-intron¹ – TK⁺-TetO₇-CMV⁺-intron²-transgene for in vitro gene expression in eukaryotic cell lines.

Group II, claim(s) 13-16, drawn to a vector encoding a therapeutically effective protein, for gene therapy in vivo.

Group III claim(s) 17-18, drawn to vector encoding a reporter protein for the detection of tetracycline or a derivative thereof in biological, food chemical or similar samples in vitro.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I does not require the biological arrays of Group II or III. Moreover, the biological arrays of Group II are directed to in vivo gene therapy while the method of Group I requires eukaryotic cells in vitro and the method of group III requires biological, food chemical or similar samples. An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single inventive concept. Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. See 37 C.F.R 1.475 (a). If multiple products, processes of manufacture, or uses are claimed, the first invention of the category first mentioned in the claims of the application and first recited invention of each of the other categories related thereto will be considered as the main invention in the claims. See 37 C.F.R 1.475 (d) and 37 C.F.R 1.476 (c). Accordingly, Groups I-III are not linked by a special technical feature.

3. It is noted claims 9 and 10 recite a list of sequences. Applicant is required to **pick one sequence** only. This requirement is applicable for all dependent claims of claim 9 and 10.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
